### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William Valance on 11/20/2009.

The application has been amended as follows:

Cancel claims 73-75.

Claim 79 replace "comprising" in the first line of the claim with "consisting of" so that the claim reads "A glass fiber consisting of the glass as defined in claim 38."

### ***Reasons for Allowance***

2. Claims 38, 40-47, 49-72, 76-85 and 87 are allowed.
3. Claims 51-72 and 76-80 have been rejoined as they require all aspects of allowed claim 38.
4. The following is an examiner's statement of reasons for allowance: the claims are not obvious in view of the closest prior art, Anderson (US 6800574). While the compositional ranges disclosed by Anderson do overlap with the ranges required by the instant claims, there is insufficient guidance in the prior art to select the composition required by the instant claims from the broadly disclosed compositional ranges disclosed therein. The instant claims require the presence of  $\text{Yb}_2\text{O}_3$ , and though Anderson discloses  $\text{Yb}_2\text{O}_3$  as a possible constituent there is no motivation for one of

Art Unit: 1793

ordinary skill in the art to select it from the broad disclosure. None of the exemplary embodiments disclosed by Anderson include  $\text{Yb}_2\text{O}_3$  and it is listed only as part of a group of 13 rare earth components that may be included in the composition (claim 4). The portion of the compositional ranges disclosed by Anderson that overlaps with the composition required by the instant claims is exceedingly narrow when the breadth of the range disclosed by Anderson is considered. Further, the exemplary embodiments disclosed by Anderson would likely lead one of ordinary skill in the art at the time of the invention to select compositions that contained  $\text{SiO}_2$  in amounts that exceeded the amount allowed by the instant claims and/or included components excluded by the consisting of language utilized in the instant claims, such as  $\text{Al}_2\text{O}_3$ . The disclosure in Anderson does not provide sufficient guidance for one of ordinary skill in the art at the time of the invention to select the narrow ranges corresponding to the composition required by the instant claims and therefore does not anticipate or suggest the claimed glass composition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to KEVIN M. JOHNSON whose telephone number is (571)270-3584. The examiner can normally be reached on Monday-Friday 9:00 AM to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jerry Lorengo can be reached on 571-272-1233. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
